Office Acti n Summary

***This application contains claims directed to the following
patentably distinct species of the claimed invention:***

A. Standardizing the thickness profile by profiled
dilution in the head box (e.g. claims 36, 57);

B. standardizing the thickness profile by steaming
during pressing (e.g., claims 37, 58);

C. standardizing via pressing (e.g. claims 38, 59);

D. standardizing via heating the web (e.g. claims 39,
60);

E. standardizing via cooling (e.g. claims 40, 61);

F. standardizing via wetting (e.g. claims 41, 42, 62,
63);

G. standardizing via machine calendering (e.g. claims
43, 44, 64, 65) and

H. standardizing via precalendering (e.g. claims 46,
48, 50, 67, 69, 71).

Applicant is required under 35 U.S.C. § 121 to elect a
single disclosed species for prosecution on the merits to which
the claims shall be restricted if no generic claim is finally
held to be allowable. Currently, claims 35, 52-54, 56, and 73-75
are generic.

Applicant is advised that a reply to this requirement must
include an identification of the species that is elected
consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Note: It is permissible and proper to make a genres/species restriction in cases filed under 371. In addition, in this specific case, since the generic claim appears to lack an

inventive special technical feature (as noted in the PCT proceedings), unity of invention is also thus lacking among these species since there is no common special technical feature among these species groupings.
